This corrigendum addresses an error in the recent taxonomic revision of *Notropis stramineus* presented by Pinion et al. (2025). In that publication, Figure 6 included the name *Notropis* (*M.*) *telescopus* linked to the voucher specimen KU 29326. As explained in the text (p. 748) this voucher specimen, which is also the source of a publicly available mitogenome (GenBank AP012100.1), was re-identified as *N. (M.) boops* prior to the publication of Pinion et al. (2025) and is referred to under that name in their Table S2. The name “*Notropis* (*M.*) *telescopus*” in Figure 6 of Pinion et al. (2025) should therefore be replaced with “*Notropis* (*M.*) *boops*”. The authors thank Michael Sandel for pointing out this error. A corrected version of the figure is shown below.

In addition, the authors regret the omission in the Acknowledgments of two individuals, M. Bean and S. Robertson, who also aided with fieldwork and facilitated access to remote areas.

**Figure 6.** Topology resulting from the species-tree summary coalescent method analysis of the complete UCE dataset (100%), representative of the most common topology recovered during analyses. Asterisks at nodes represent LPP or BS support greater than or equal to 0.95 or 95, respectively, shown only if consistent across all UCE analyses. Branch leading to root truncated for visualization purposes. Clade colors match that of Figure 5.
