Abstract

This checklist is an extension of an earlier one, with most of the new records derived from the Trakya University Herbarium (EDTU) and published between 1982 and 2023. It comprises a total of 712 new records, representing 79 families, 283 genera, and 548 taxa. The new records are organized by five provinces of the European Turkey and presented in alphabetical order in a table. A total of ten taxa have conservation categories and five taxa are endemic to Turkey. The data about 28 previously unpublished taxa collected from some provinces are published here. From the Edirne Province, 389 new records have been documented, rated as follows: five taxa with VU status, one CR taxon, one EN taxon, and two endemic taxa. From the Kırklareli Province, a total of 217 new records have been provided, three classified as VU and two endemic. The total number of new records for Tekirdağ is 59, of which three have VU status and one is endemic. For Çanakkale, 43 new records are documented, including two VU taxon. Istanbul has provided four new records, of which one taxon is endemic. The most numerous taxa belonged to *Fabaceae* (108), *Asteraceae* (55), *Caryophyllaceae* (29), *Orchidaceae* (29), *Ranunculaceae* (27), *Brassicaceae* (21), *Poaceae* (18), *Liliaceae* (18), etc. These taxa have not been listed in any earlier volumes of the *Flora of Turkey*, or checklists. The inclusion of all new records in virtual databases related to the *Flora of Turkey* has been examined, and it was concluded that none of them have been processed in these databases. Furthermore, these new records have been cross-referenced with numerous virtual databases of European origin, and it was found that they have not been included in those databases yet.

Key words

additional records, check list, flora, unpublished taxa

Aybeke, M. 2025. New records for the flora of different provinces of European Turkey, reported in the last forty years. – *Phytologia Balcanica*, 31: 11-36. -- ISSN 1310-7771 (print), 1314-0027 (online).

Introduction

Since the publication of the *Flora of Turkey* (Davis 1965-1985; Davis & al. 1988), the native flora of Turkey has attracted strongly the attention of botanists, both from Turkey and abroad. Since then, with the increasing number of studies, many plants have been included in the Turkish flora inventory. Since Turkey is a country with extraordinarily rich flora and vegetation due to its climate, soil and geographical features, new additions

are always possible. As a result of such interest, the flora of Turkey is now becoming better known. New volumes on the *Flora of Turkey* have been published describing new taxa (Davis & al. 1988; Güner & al. 2000). A total of 8796 species are included in these 11 volumes, of which 2941 are endemic to Turkey. Publication of the *Flora of Turkey* has further contributed to the knowledge of the native flora, thus entailing new researches and adding new taxa. These new taxa have been published as a series of articles as *Checklists of additional taxa to the Supplement to the Flora of Turkey*. The checklists have been

documented in a series of articles based on all original publications of the taxa since 1994 (Özhatay & Kültür 2006; Özhatay & al. 1994, 2009, 2011, 2013, 2015, 2017, 2019, 2022). Güner & al. (2012) have published the book *List of the Plants of Turkey (Vascular Plants)*, which includes 12 new species. By 2019, including that book and the related checklists, a total of 638 new taxa have been added to the Turkish flora. This stands for a total of 508 taxa newly described for the world, and 130 taxa newly identified for Turkey. Research in this area is ongoing.

The territory of European Turkey accounts for 3% of Turkey's total area (23 764 km²), with Turkish Thrace as a meeting point for plant species from three major floristic regions. Based on the *Flora of Turkey* and ISTE records, approximately 2350 taxa have been identified within the flora of Thrace, and the number continues to grow. While most of these collected plants are stored in the ISTE Herbarium, an increasing number of them are also housed in the Trakya University Herbarium (EDTU). Established in 1983 as part of the regional university, the EDTU Herbarium has been steadily expanding its collection to become a key source for the regional flora. Recent studies have added many new plant records to the EDTU Herbarium, thus enhancing the knowledge of the flora of Thrace and contributing significantly to a broader understanding of Turkey's and Europe's botanical diversity.

This review focuses on the new records housed by the EDTU Herbarium since its establishment in 1983 up to 2023, and on presentation of the so far unpublished findings by analyzing them in detail. Given the extensive list of new records, the first part of this review has been recently published (Aybeke 2024), while this section is a continuation of that work. This second and final installment summarizes in a table the provincial-level records from European Turkey, dated between 1982 and 2023 and unincorporated yet in the multivolume *Flora of Turkey*. Together, the two reviews offer comprehensive access to numerous new records, particularly those originating from the EDTU Herbarium.

Material and methods

In this review, new records from the above-specified period have been examined, with a particular focus on publications registered in the EDTU Herbarium. Also, 28 unpublished taxa are presented and documented for the first time here. The checklists of Özhatay & al., cited above and originating from the EDTU Herbarium, have been also reviewed. For each taxon, the specific region of its publication is indicated: A1(E) Edirne, A1(E) Çanakkale, A2(E) Istanbul, A1(E) Kırklareli, and A1(E) Tekirdağ. Families and genera in the new records are described and listed based on the Turkish flora sources (Davis 1965–1985; Davis & al. 1988), EDTU Herbarium data, e-flora, and web-based databases (Euro+Med 2006+; GBIF 2024; POWO 2024).

Results

Twenty-eight previously unpublished taxa collected from some provinces and the materials deposited in EDTU are listed below and also included in Table 1.

Aceraceae

1. *Acer platanoides* L.

Tu(E) A1(E) Edirne, Center, Fac. campus environment, 24.04.1989, coll. *F. Dane*, det. *M. Aybeke* (EDTU 3407).

Fabaceae

2. *Dorycinum pentaphyllum* subsp. *herbaceum* (Vill.) Bonnier & Layens

Tu(E) A1(E) Edirne, Keşan, Yerlisu, 21.06.1984, coll. *N. Başak*, det. *M. Aybeke* (EDTU 74); Keşan, Keşan-Yerlisu, under pine, 14.06.1985, coll. *B. Kasaplıgil*, *H. Demiriz*, *N. Başak*, *F. Dane* & *A. Asan*, det. *M. Aybeke* (EDTU 228).

– A1(E) Tekirdağ, Şarköy, Şarköy entrance, 14.06.1985, coll. *N. Başak* & *A. Asan*, det. *M. Aybeke* (EDTU 241); Muratlı, Muratlı - Lüleburgaz 15th km, field edge, 22.06.1987, coll. *N. Başak* & *A. Asan*, det. *M. Aybeke* (EDTU 1561).

3. *Gleditsia triacanthos* L.

Tu(E) A1(E) Edirne, Merkez, 4th km between Sığircılı and Meşeli, under çeşme, 09.06.1987, coll. *G. Dalgıç*, *F. Dane* & *N. Polat*, det. *M. Aybeke* (EDTU 1261); Center, terminal surroundings, 09.06.1989, coll. *F. Dane*, det. *M. Aybeke* (EDTU 3346).

4. *Hymenocarpos circinnatus* (L.) Savi

Tu(E) A1(E) Edirne, Uzunköprü, 3 km from Uzunköprü-Çöpköy, 25.04.1987, coll. *F. Dane* & *G. Olgun*, det. *M. Aybeke* (EDTU 622); Center, Karaağaç, station surroundings, 18.05.1987, coll. *F. Dane*, det. *M. Aybeke* (EDTU 660); Keşan, Mercan pond outlet, 27.05.2001, coll. *G. Dalgıç*, det. *M. Aybeke* (EDTU 8016).

5. *Lathyrus sativus* L.

Tu(E) A1(E) Edirne, İpsala, Koyunyeri village, 05.05.1987, coll. *F. Dane*, det. *M. Aybeke* (EDTU 2850); Havsa, Sinit Lake Dam, 30.05.1989, coll. *İ.Ö. Aygün*, det. *M. Aybeke* (EDTU 3231).

6. *Lotus angustissimus* L.

Tu(E) A1(E) Çanakkale, Gelibolu, Maharız, 5.05.1998, coll. *G. Dalgıç*, det. *M. Aybeke* (EDTU 7301).

– A1(E) Tekirdağ, Şarköy, 25.07.1987, coll. *F. Dane*, det. *M. Aybeke* (EDTU 1797).

7. *Lotus corniculatus* var. *tenuifolius* L.

Tu(E) A1(E) Tekirdağ, between Allupullu - Hayrabolu, roadside, 22.06.1987, coll. *G. Dalgıç*, *F. Dane*, *H. Arda*, det. *M. Aybeke* (EDTU 1457); Şarköy, 02.08.1987, coll. *F. Dane*, det. *M. Aybeke* (EDTU 1818).

8. *Medicago arabica* (L.) Huds.

Tu(E) A1(E) Edirne, 25.05.1987, coll. *F. Dane*, det. *M. Aybeke* (EDTU 2718); Center, faculty campus environment, 09.06.1989, coll. *F. Dane*, det. *M. Aybeke* (EDTU 3383); Lalapaşa, 4th km between Donköy and Hamzabeyli, 21.05.1992, coll. *S. Gür & F. Güdücü*, det. *M. Aybeke* (EDTU 4884).

9. *Medicago falcata* L.

Tu(E) A1(E) Edirne, Keşan, Mecidiye road turn off, 08.07.1988, coll. *N. Polat & F. Dane*, det. *M. Aybeke* (EDTU 2335); Merkez, Tunca surroundings, 21.08.1989, coll. *F. Dane*, det. *M. Aybeke* (EDTU 4111).

10. *Medicago marina* L.

Tu(E) A1(E) Edirne, Enez, beach side, 20.04.1995, coll. *O. Yıldırım*, det. *M. Aybeke* (EDTU 3117); İpsala, İbriktepe, 24.03.1990, coll. *G. Dalgıç*, det. *M. Aybeke* (EDTU 4270); Keşan, Erikli Köyü, beach, 12.08.2001, coll. *G. Dalgıç*, det. *M. Aybeke* (EDTU 8258).

– A1(E) Tekirdağ, Şarköy, beach, 20.07.1991, coll. *F. Dane*, det. *M. Aybeke* (EDTU 5196).

11. *Medicago minima* (L.) Bartal. var. *minima*

Tu(E) A1(E) Edirne, Karakasım, rice field, 07.06.1989, coll. *F. Dane & N. Polat*, det. *M. Aybeke* (EDTU 3299).

12. *Medicago polymorpha* L. var. *vulgaris* (Benth.) Shinners

Tu(E) A1(E) Edirne, Centre, campus, 08.06.1989, coll. *F. Dane & N. Başak*, det. *M. Aybeke* (EDTU 3693, 3718); Lalapaşa, Hamzabeyli village, oak forest, 21.05.1992, coll. *E. Özer*, det. *M. Aybeke* (EDTU 4775).

13. *Melilotus indica* (L.) All.

Tu(E) A1(E) Edirne, Merkez, Judge's houses, 09.06.1989, coll. *F. Dane*, det. *M. Aybeke* (EDTU 3359); Center, campus surroundings, 08.06.1989, coll. *F. Dane*, det. *M. Aybeke* (EDTU 3721).

14. *Melilotus officinalis* (L.) Desr.

Tu(E) A1(E) Tekirdağ, Muratlı, Muratlı – Lüleburgaz 15th km, field edge, 22.06.1987, coll. *G. Dalgıç & N. Başak*, det. *M. Aybeke* (EDTU 1548).

15. *Securigera securidaca* (L.) Degen & Dörfel.

Tu(E) A1(E) Edirne, Keşan, Mecidiye, 10.07.1992, coll. *G. Dalgıç & F. Dane*, det. *M. Aybeke* (EDTU 5186).

16. *Trifolium angustifolium* L. var. *angustifolium*

Tu(E) A1(E) Kırklareli, Lüleburgaz, Lüleburgaz Martırdom, 7.06.1991, coll. *G. Kasapoğlu*, det. *M. Aybeke* (EDTU 4671).

17. *Trifolium campestre* Schreb.

Tu(E) A1(E) Tekirdağ, Şarköy, Uçmakdere coastal ridges, 11.06.1999, coll. *G. Dalgıç*, det. *M. Aybeke* (EDTU 7381).

18. *Trifolium patens* Schreb.

Tu(E) A1(E) Edirne, Lalapaşa, 4th km between Donköy and Hamzabeyli, 21.05.1992, coll. *F. Yılmaz*, det. *M. Aybeke* (EDTU 4910).

19. *Trigonella procumbens* (Besser) Rchb.

Tu(E) A1(E) Edirne, Merkez, campus, 08.06.1989, coll. *F. Dane*, det. *M. Aybeke* (EDTU 3715).

Lamiaceae**20. *Lamium album* L.**

Tu(E) A1(E) Edime, Center, field and roadside, 20.04.1995, coll. & det. *F. Dane* (EDTU 6021).

Orchidaceae**21. *Cephalanthera longifolia* (L.) Fritsch**

Tu(E) A1(E) Çanakkale, Gelibolu, Fındıklı-Değirmendüzü road, 1.8 km before Değirmendüzü, the right side of the road, on the slope, 18.06.2002, coll. & det. *M. Aybeke* (EDTU 8379); between Anafartalar and Bolayır, 20.05.1987, coll. *F. Dane*, det. *M. Aybeke* (EDTU 1075).

22. *Dactylorhiza romana* (Sebast.) Soó

Tu(E) A1(E) Edirne, 3.3 km from Edirne, Keşan, Gökçe-tepe-Sazlıdere turnout to Sazlıdere, on the left of the road after the bend, dirt road in the forest, 05.05.2002, coll. & det. *M. Aybeke* (EDTU 8341).

23. *Himantoglossum caprinum* (M. Bieb.) Spreng.

Tu(E) A1(E) Edirne, Merkez, Güllapoğlu Arboretum, 01.07.2001, coll. & det. *M. Aybeke* (EDTU 8253).

24. *Ophrys apifera* Huds.

Tu (E) A1(E) Çanakkale, Gelibolu, between Tayfur and Cumalı, approximately 500-700 m after the dam, on the hills to the right of the asphalt, 12.05.2001, coll. & det. *M. Aybeke* (EDTU 8249).

– A1(E) Kırklareli: Dereköy, on Kırklareli-Dereköy road, on the left side of the road, in a quarry, 508 m, 41°55'48"N, 27°22'14"E, 28.04.2001, coll. & det. *M. Aybeke* (EDTU 8225); between Kofçaz-Kocayazı, 1.2 km to Kocayazı turnout, on the right side of the road, in an oak and hornbeam forest, 637 m, 41°57'56"N, 27°12'19"E, 29.04.2001, coll. & det. *M. Aybeke* (EDTU 8229).

25. *Ophrys oestrifera* M. Bieb. subsp. *oestrifera*

Tu(E) A1(E) Çanakkale, Gelibolu, Kilitbahir forests, *Pinus*-dominated forest area, 20.04.1995, coll. *N. Güler*, det. *M. Aybeke* (EDTU 6199).

26. *Orchis fragrans* Pollini

Tu (E) A1(E) Çanakkale, Eceabat, Arıburnu, Anzac Cove, around Canterbury cemetery, bottom right of the road, seaside, in the maquis, 16.05.2003, coll. & det. *M. Aybeke* (EDTU 8433).

- A1(E) Edirne, Keşan, Between Erikli and Beyköy, on the ridges to the right of the hill-bend as you exit Erikli, 18.05.2002, coll. & det. *M. Aybeke* (EDTU 8363).
- A1(E) Kırklareli, Kastro, on the slope near the seaside, stony area, 18.05.2001, coll. & det. *M. Aybeke* (EDTU 8240).
- 28. *Serapias orientalis*** (Greuter) H. Baumann & Künkele
Tu (E) A2(E) Istanbul, Çatalca, at the 18th km from Binkılıç (Çilingoz), on the left of the road, the plowed oak area, 18.05.2001, coll. & det. *M. Aybeke* (EDTU 8241).
- A1(E) Kırklareli, Kastro, located on the slopes near the seaside, in stony and bushy areas, 18.05.2001, coll. & det. *M. Aybeke* (EDTU 8237).

27. *Serapias bergonii* E.G. Camus

Tu (E) A1(E) Edirne, Enez, at approximately 1 km after exiting Abdürrahim village, on the dirt road to the right of the road, 22.04.2001, coll. & det. *M. Aybeke* (EDTU 8219); Keşan, at the entrance to from Danişment to Erikli, 200-300 m after the vilas, the right side of the road is in the hillside area, 18.05.2002, coll. & det. *M. Aybeke* (EDTU 8362).

With the additions given above, a total of 712 new records belonging to 79 families, 283 genera and 548 taxa reported for the five provinces of European Turkey – Edirne, Kırklareli, Tekirdag, Çanakkale and Istanbul are presented in Table 1.

Table 1. New records for the flora of different provinces (* - endemic taxa; **IUCN** categories, according to Ekim & al 2000: **CR** - Critically Endangered, **EN** - Endangered, **VU** - Vulnerable).

Conclusion

This review includes a total of 712 new records for the five provinces of European Turkey, belonging to 79 families, 283 genera and 548 taxa, published for the first time in the last 40 years, between 1982 and 2023, which are mainly stored in the EDTU Herbarium. The new records are presented in alphabetical order in a table. Ten taxa are with IUCN categories: one species is Critically Endangered (CR), one is Endangered (EN), eight taxa are Vulnerable (VU), and five taxa are endemic. Twenty-eight previously unpublished taxa collected from some provinces and the materials deposited in the EDTU have been added to this review.

Namely, 389 new records from Edirne, 217 from Kırklareli, 59 from Tekirdağ, 43 from Çanakkale, and four from Istanbul are summarized in Table 1. Of the 389 new records for the Edirne Province, five taxa (*Achillea clypeolata*, *Anemone blanda*, *Galanthus nivalis* subsp. *nivalis*, *Leucjum aestivum* and *Ornithogalum refractum*) have been rated as VU, one taxon (*Dianthus ingoldbyi*) as CR, one taxon (*Rorippa thracica*) as EN, and two taxa (*Dianthus in-*

goldbyi and *Tripleurospermum baytopianum*) as endemic. Within the 217 new records of the Kırklareli Province, three have VU status (*Anemone coronaria*, *Galanthus nivalis* L. subsp. *nivalis* and *Ornithogalum refractum*), and two taxa (*Anchusa leptophylla* subsp. *incana* and *Euphorbia amygdaloides* var. *robbiae*) are endemic. The total number of new records for Tekirdağ is 59, three of which are VU (*Anemone blanda*, *Anemone coronaria* and *Silene fabarioides*), and one is endemic (*Onobrychis armena*). Of the 43 new records for Çanakkale, two species have VU status (*Anemone coronaria* and *Eleocharis uniglumis*). There are four new records for Istanbul, of which one taxon (*Euphorbia amygdaloides* var. *robbiae*) is endemic.

The highest number of new records have been reported from the families *Fabaceae* (108), *Asteraceae* (55), *Caryophyllaceae* (29), *Orchidaceae* (29), *Ranunculaceae* (27), *Brassicaceae* (21), *Poaceae* (18), *Liliaceae* (18), etc.
